Title

Drones for high resolution environmental surveys and mirat biological treatments.

Innovative non-polluting tools such as drones, fast to provide a service aimed at agri-environmental respect. Reliefs of parts of trees or buildings without hindrance to traffic, without the use of noisy and polluting air platforms, avoiding the dangers of triggering accidents for mobile sites, do not require public land occupation, speeding up paperwork in permits and reducing costs.

Aims

Nicchia di servizi altamente specializzati con strumenti innovativi in grado di catalizzare domande di mercato nuove e sempre più richieste come la tutela della salute considerando l'amianto inquinante nell'ambiente sia urbano sia ambientale oltre al monitoraggio delle discariche.

Results

The innovative idea comes from a professional outlet able to overcome the great difficulties of the current market in traditional services. This co-funded contribution represents a fundamental stepping stone for the development of new agri-environmental services.

project co-funded by the European Regional Development Fund
